

Natural Odour Neutralisation for everyday life

Product Catalogue

Natural Odour Neutralisation for everyday life

PowAir is a powerful and effective odour neutraliser. It is made using a natural formula and is safe to use around people and animals. PowAir has all the power you need to eliminate virtually any type of odour. If you have an odour problem; use PowAir and it will be eliminated safely, naturally and permanently.

Why PowAir?

PowAir is a series of complex formulas, using all natural essential oil technology, designed to simplify odour control and odour management.

Formulated by specialist chemists, PowAir is a unique blend of natural essential oils that combine to give their powerful odour neutralisation capabilities. PowAir attacks, neutralises and destroys a wide spectrum of organic and non-organic odours.

How does it work?

How does PowAir work to eliminate your nasty odour problems? Well it all happens naturally on a molecular level. When you're using our blocks, gels or sprays, PowAir evaporates and disperses into the air. The rate of evaporation and dispersion is controlled by ambient conditions, such as air flow, temperature and humidity – in addition to the amount of product used. Scientifically speaking there are three methods of odour neutralisation that occur: adsorption, absorption and chemical reaction.

PowAir Penetrator

The lean, mean, odour eating machine...

The all-rounder, the ultimate in odour neutralisation.

PowAir Penetrator is made from essential oils which are naturally derived, and includes a range of microbial enzymes. The high performance enzymes are validated with scientifically backed performance data. The dual action performance that this gives makes it a unique and unrivalled odour neutraliser for the household and commercial market.

Penetrator permanently eliminates organic odours, including cat urine, sweat, body odour, vomit, faeces, grease, mildew and smoke when trapped in porous materials such as fabrics, textiles, upholstery, carpet, and wood.

PowAir Sport

Tackle sweaty odours with PowAir Sport

Eliminate odours from sports gear with PowAir Sport spray! Simply spray it onto your sports gear to neutralise odours at the source. PowAir Sport spray is a powerful blend of natural essential oils, beneficial bacteria and high-performance enzymes that safely eliminates odours caused by bacteria, sweat and organic material. PowAir Sport is biodegradable and safe to use on sports equipment, athletic apparel, footwear, gym bags and more.

How does it work?

The essential oil molecules in PowAir Sports Spray bond to odour molecules and neutralise foul odours on contact. PowAir Sport Spray and all of the PowAir range are free from toxic or harmful ingredients.

The building blocks of odour neutralisation...

The odour neutralising solution for any environment

PowAir Blocks eliminate bad odours safely and permanently from the air. It is a proven essential oil based odour neutraliser, infused with refreshing aromatic scents. PowAir Block is an odour neutraliser in solid form; a complex formula of essential oils – environmentally friendly and easy to use in your home and business, and can be safely used around people and pets.

PowAir Blocks are ideal for pet smells around dog baskets, cat litter trays and toilets. Cars, boats and motor-homes are suitable for Blocks, especially when they have been in storage and subject to dampness or mustiness.

PowAir Block is a powerful odour neutraliser and can be used to keep areas free from undesirable odours. It is very effective in small areas and spaces such as cupboards, garbage storage areas, bathrooms, closets, hallways, attics, kitchens and bedrooms. Simply remove the seal and place the PowAir Block in your desired location.

PowAir Gel

The Odour Neutraliser that goes the extra mile...

Are you still using air fresheners to cover up smells? If you are, you aren't actually doing anything to take care of the smell, you are just masking an odour that is present. PowAir Gel uses essential oil based odour removal technology to quickly and safely remove bad smells rather than just covering them up.

Available in multiple sizes, our PowAir Gel range is suitable for any and all environments with zero compromise to odour neutralisation.

Using PowAir Gel with maximum efficiency.

The simplest way to use PowAir Gel is to remove the lid and leave it around the origin of the odour to naturally evaporate and disperse through the air (occasionally shake the jar to agitate the contents).

If there is a large area that needs to be neutralised then you will need a way to disperse the gel further throughout the affected area. There are a few ways that this can be achieved...

PowAir Gel can be decanted into multiple containers and positioned evenly around the area requiring treatment, increasing the effective coverage of odour neutraliser.

Another option is to use the PowAir Breeze or Cyclone fans. These fans sit on top of the Gel containers and have a number of settings to suit your needs, simply switch on and let the fans take care of the rest.

Where to use PowAir Gel

Maximise the distribution of our Gels with our PowAir Breeze and Cyclone fans. View the PowAir Breeze & Cyclone fans on page 21.

PowAir Misting Dome

Unwind, relax and restore your mind with our Misting Dome...

The PowAir Misting Dome disperses a steady, gentle mist of PowAir Liquid into the chosen environment, removing any unwanted odours and replacing them with a natural, fresh smell created with essential oils.

This Aroma Mist Diffuser is a subtle device that can fit perfectly in any environment around your home, office and working environment. The colour changing lighting feature can be set to individual colours, or a gradient mix.

For best results, use in conjunction with PowAir Liquid. Our liquids come in a concentrated state, so they can be diluted with water to your satisfaction if the scent is too strong.

Key Features

Easy to use. Simply plug-in and turn on, and you're good to go.

Seven LED changing lights, enhances and creates a relaxing atmosphere.

Internal timer function allows you to have your misting dome active for 1/3/5h intervals.

Use with any PowAir Liquid for best results, neutralising odours and giving you a great smelling environment.

PowAir Breeze Fan

Neutralising odours naturally is a Breeze...

PowAir Breeze Fan increases the rate of evaporation of PowAir Gel and it increases airflow, giving you the ability to manage really bad or larger odour problems cost effectively. The Breeze Fan was developed to work exclusively with **732g Jar, & 3.8kg Pail** PowAir Gel products.

PowAir Breeze includes high and low speed options for high or moderate intensity odours. It can provide odour neutralisation for a room up to 166 square meters. If you need a little assistance with eliminating those offensive odours, the Breeze Fan is affordable, effective and provides excellent value.

PowAir Breeze Fan to be used with 732g PowAir Jar & 3.8kg Pails.

PowAir Cyclone Fan

Harness the power of nature...

The PowAir Cyclone fan is a high quality distribution system that is designed to work exclusively on a **20kg PowAir Gel Pail**. The Cyclone fan increases both the rate of evaporation of PowAir Gel and the airflow in the area being used which provides efficient high volume, high capacity odour control in the worst odour conditions.

Using less power than a light bulb, the PowAir Cyclone provides odour control for up to 465 square metres. A variable 5-speed push button switch controls fan speed so you can adjust your airflow to eliminate odours efficiently and cost effectively.

PowAir Cyclone Fan to be used with 20kg PowAir Gel Pails.

When nature and science collide...

PowAir odour neutralising products consist of complex formulations representing a variety of chemical compounds and offering different functionalities, both structural and chemical.

The technology behind PowAir was initiated over 25 years ago. The scientist (who was eventually credited with the invention of PowAir) became fascinated when he observed that when terpenes were diffused into the environment, emission's and odours were reduced. Inspired by this finding, further evidence showed that the odours were not just masked but permanently removed.

The result was a set of specialised formulations that neutralise a wide spectrum of organic and inorganic odour problems – effectively, efficiently and permanently. Manufactured under strict quality controls, the components of PowAir are generally recognised as common in the food industry and have a long history of safety.

Terpenes, nature's aroma...

Terpenes are widespread in nature, mainly in plants as constituents of essential oils. Many terpenes are hydrocarbons, but oxygen-containing compounds such as alcohols, aldehydes or ketones (terpenoids) are also found. Their building block is the hydrocarbon isoprene, $\text{CH}_2=\text{C}(\text{CH}_3)-\text{CH}=\text{CH}_2$.

When diffused into the environment, terpenes have been found to reduce airborne chemicals and bacteria. Terpenes have anti-bacterial, anti-fungal and anti-septic properties and have oxygenating properties (increases oxygen level).

Terpene characteristics appear to either destroy the odour molecule or convert it to a more acceptable level.

How PowAir Works

Adsorption

First, electrostatic and molecular forces cause PowAir molecules to attract and bond with odour molecules – this is adsorption.

Absorption

Absorption occurs when a PowAir molecule soaks up an odour molecule, which neutralises the odour as a result.

Chemical Reaction

When a chemical reaction occurs, the combined PowAir and odour molecules react and change to create a neutral compound, eliminating the odour.

Maximise the power of PowAir...

From a gym changing room, a public toilet, your home to your car, PowAir has a product for every environment you can think of.

Due to PowAir's excellent odour neutralisation capabilities and different forms, sizes and dispenser types, this odour removal product can be used in a vast array of different situations from home use to industrial applications. We will explore different environments and industries to see what products are best for various situations.

We've broken it down over several environments and industries - but it doesn't stop there, these are only guidelines. PowAir is effective everywhere and anywhere.

Keep those pets smelling purrrfect...

Safe to use around your pets.

Cats & dogs can naturally produce some particularly bad smells. Your pets may even become contaminated with odours from other sources in various environments. Eliminate these bad smells permanently using PowAir odour neutraliser.

Don't mask pet odours, neutralise them!

PowAir does not mask the odour like other pet odour removal products, but completely removes it from the air using a scientifically advanced blend of natural essential oils, which is safe to use around your family and your pets. No matter if your problem is dog urine in the carpet, cat urine in your front porch, or pet odours in your car, this odour neutraliser will remove the odour permanently while leaving behind the fresh scent of your choice.

Tackle those sweaty odour problems...

Keep sweaty smells at bay with PowAir Sport...

While playing sports, or keeping fit, your body will begin to sweat. Constant exposure to sweat or similar bodily fluids on clothing and equipment can create long lasting and often harsher odour if left untreated. Using PowAir Sport will prevent those odours from getting worse and even neutralise them completely!

You can use PowAir Sport to immediately eliminate odours or to prevent odour build up in storage places for your sports and fitness equipment.

Make your house a great smelling home...

Use PowAir with confidence.

PowAir's unique natural formula is tried and tested and has been developed using natural essential oils giving PowAir its unique odour neutralisation process – adsorption, absorption and chemical reaction. Ensuring odour is neutralised completely, and safely.

Remove odours within your home effectively and instantly...

Your home is yours and your family's sanctuary. Keeping it clean and smelling fresh is important. The PowAir range is highly versatile meaning that our products can be used in a variety of situations, to eliminate a variety of odours. From artificial grass to mattresses, we've got you covered!

To hear more about where you can use PowAir products and how to use them, head to our website and take a look at the PowAir Blog. Alternatively, if you are more of a visual learner, the PowAir UK YouTube channel covers a variety of our products, showing you where and how to use them to their full potential.

 **YouTube** PowAir UK

Driving out those bad odours...

Vehicles can become home to many unwelcome odours over the years, which can be distracting while driving. No matter the size of your vehicle or what it's used for, PowAir can help to remove those bad smells.

This on-the-go odour neutraliser, gives you a fresh smelling vehicle all day, every day. The AutoMist vehicle mist diffuser disperses a steady, gentle mist into the air of your car, removing unwanted smells and replacing them with a natural, fresh smell created with essential oils. Use the PowAir AutoMist in conjunction with PowAir Liquid for safe and natural odour control.

Domestic and Commercial Vehicles, PowAir has you covered...

If you're looking for odour neutralising solutions in your car, taxi, work van and private coaches, we've got a product for you that will neutralise those odours discreetly and effectively. Alongside the AutoMist, another great solution that is simple yet effective, is to neutralise vehicle odours using a PowAir Block.

Simmer away unwanted odours naturally & effectively...

Keeping a standard of odour control for your customers.

In the hospitality industry, we know customer experience is the number one priority. Keeping your facilities odour free is just one less thing to worry about, giving you time and space to give your customers the service they deserve.

Working in hotels, bars and restaurants has plenty of opportunities to create bad odours, which in turn will create unpleasant experiences for your customers. That's why we recommend using PowAir Gels. Whether you choose to unscrew the lid and leave the crystals to work their magic in their original container, or separate them into smaller tubs to eliminate odours on a larger scale, PowAir Gel has you covered! Keep your hospitality environment odour free with PowAir.

Healthcare doesn't stop, neither does PowAir...

Keeping the health care industry clean & fresh...

Not only is PowAir ideal for homes and offices, but also health care environments too. It's important to keep those odours at bay, no matter the environment, to ensure the area is comforting for all. One of the easiest ways to create a calming, odour free environment is with our Harmony Mist Diffuser.

This diffuser disperses a steady, gentle mist into the air of the environment, removing any unwanted odours and replacing them with a natural, fresh smell created with essential oils.

Odour neutralisation around the clock.

Health Care professionals work around the clock, and so do our products. A quick spritz of our trusty PowAir Spray is a great way to eliminate odours effectively, with ease. Choose from four fantastic fragrances: Apple Crumble, Passion Fruit, Tropical Breeze and Lemongrass and let the essential oils work their magic.

Eliminating odours has never been so quick and easy!

How to use

Common odour problems...

Did you know that our PowAir products have more than one use? With customers across the globe using them for a variety of home deep cleaning activities. Our products act as silent home odour neutralisers, constantly eliminating smells in the background. Here are some common odour problems PowAir helps to tackle!

Pet pee odours

PowAir's best-selling product, by far, is our Urine & Odour Spray. Not only is this odour neutraliser loved by humans, but their furry friends too! PowAir Urine & Odour Spray compliments home deep cleaning perfectly by providing you with the peace of mind that those pet pee smells are no longer lingering around your home. After all, it's easy to become immune to these smells as they remain in your living area over time. For guests and pets, this is not so much the case!

Mattress Odours

Your mattress is only one spill away from being essentially ruined by odours. Not ideal when you've spent hundreds of pounds and hours of browsing trying to pick the perfect mattress! But how do you clean a mattress? You can use PowAir Penetrator, a dual-action odour eliminator that will leave your mattress smelling as fresh as the day you bought it!

Artificial Grass Odours

When the weather is warm and with the sun shining, quality time in the garden is calling your name. There is nothing more inviting than a day in the garden with family and friends, kicking around playing games, enjoying great food and a well-deserved drink. What's even better is the relief of knowing that your garden is clean and neutralised from any odours, even down to removing odours from your Artificial Grass. We hear you asking, "does artificial grass smell" and the answer is yes! Even your fake grass carries unwanted odours. We recommend using PowAir Penetrator or Urine & Odour.

Smoke Smells in your House

Having the smell of smoke lingering around your home, office or workplace is never pleasant. Not only for yourself, but also for visitors too. The smell of smoke easily clings to fabrics and furniture nearby making it present in your home for days, and even weeks to come. However PowAir Gel can help you with this problem and is available in four fantastic fragrances.

PowAir Gel is the perfect way to eliminate smoke smells and can be used two ways. Whether you choose to remove the lid and leave the gel to work its magic or separate the crystals into smaller containers, this gel is bound to successfully remove smoke smells.

Bathroom Odours

It's no surprise that some of the worst odours in your home will be coming from your bathroom. Although aerosol sprays can help mask odours, they actually aren't eliminating them. This means that the particles still exist in the air. Thankfully, PowAir have the perfect Spray for you to use in your bathroom that is both aerosol free and permanently eliminates odours with a variety of fragrances to choose from. Simply spray into the atmosphere of your bathroom and let the essential oils work their magic.

Wet dog smell

No matter how much you love your pup, the smell of wet dog lingering around your home is one that you just can't turn a blind eye to. That's why we recommend using PowAir Blocks to eliminate bad odours safely and permanently from the air. It is a proven essential oil-based odour neutraliser infused with refreshing aromatic scents. An odour neutraliser in solid form. It is a complex formula of essential oils – environmentally friendly and easy to use in your home or business, and can be used around people and pets.

Create a relaxing environment

Before guests enter your home, there is always that worry that your house could be cleaner, or could smell better. If you are worried that there may be some uninvited odours lingering around your home, you need a PowAir Misting Dome! Dispersing a steady, gentle mist of PowAir Liquid into the atmosphere to eliminate odours and create a fresh, welcoming environment.
